

A detailed line drawing of a guitar body template. The body is asymmetrical, with a rounded upper horn and a pointed lower horn. Two rectangular pickup cavities are shown, each with two mounting holes on the left and one on the right. A control cavity is located on the upper horn with two mounting holes. The bridge is represented by a large circle at the bottom. Numerous other mounting holes are distributed across the body. Dimension lines indicate the width of the pickup cavities and the distance between them.
